

## **HDD Simulator Training**

### **D24X40II/D24x40S3/D23X30S3**

**Location:** Vermeer India workshop, Chennai, Tamilnadu

**Number of Days:** 03 Days

**Batch size:** 03 Operator / Batch

### **Description of training:**

Horizontal Directional Drill being a special purpose machine, requires a skilled operator. This Simulator Training Module helps your new team members become an expert HDD Operator. It also introduces them to basic drilling functions and understand the concept of Horizontal Directional Drill before they operate the real HDD Machine. With the increasing number of HDD machines in India, there is lack of skilled operators and this training helps you bridge that gap.

### **Benefits of HDD simulator training:**

- The simulator is nothing but the Operator station with all controls and gives the feel of operating actual machine
- Using Vermeer HDD Simulator, operators learn the right practices and get used to new model machine automation and smooth operation without damaging your own machine.
- Using the virtual space, operator can learn and practice new skills and enhance their existing operating skills

### **Training Includes:**

Evaluation of Operating Skills  
3 days Advance Operator Training on Simulator  
Test - To Re-Evaluation the Operating Skills  
Training Material

### **Training Charges:**

Fees INR 40,000/- Per Operator for the course  
Includes Accommodation  
- Transportation from hotel to workshop and Back  
- Lunch  
(T&C Apply)
