

Problem - Engine Starting Issue

User Approach -

Issues like heating, excessive smoke from the exhaust, sudden decrease in rpm on load conditions are very commonly reported. Sometimes the users delay the necessary actions like, change of hydraulic oil, change of filters, reusing the used filters to save on cost.

Vermeer Advise - The above-mentioned issues can easily be avoided by doing periodic maintenance of your machine using Genuine Vermeer spare parts.

- It is mandatory to use new filters instead of reusing the old filters.
- The hydraulic oil in the machine should also be replaced at recommended intervals.
- Use of same oil for longer duration affects pumps and other parts of machine.
- Customers can follow below mentioned table for their Vermeer Equipment maintenance

PERIOD	LUBRICANTS AND FILTERS TO BE REPLACED
250 HRS	ENGINE OIL, ENGINE OIL FILTER, DIESEL FILTERS, FMC OIL
500 HRS	INCLUDING 250 HRS SERVICE, HYDRAULIC FILTERS, GEAR OIL
750 HRS	ENGINE OIL, ENGINE OIL FILTER, DIESEL FILTERS, FMC OIL
1000 HRS	INCLUDING 500 HRS SERVICE, ENTIRE HYD OIL, STRAINERS, COLANT

Conclusion – You can avoid many minor issues on your machine just by following the recommended service schedule above and using Genuine Vermeer spare parts. **Adhering to the periodic maintenance schedule, right maintenance practices and usage Genuine Vermeer spare parts will ensure reduction in maintenance cost, increase in lifecycle, improved performance, productivity** leading to higher profitability. Always remember, if you don't schedule time for maintenance, your equipment will schedule it for you.
